After receiving requests to provide flags for ALL the regiments that fought during the 100 Days Campaign, and not just those that fought at Waterloo, my solution is **THE BATTLE OF WAVRE!**

These sets comprise 240 printed colour flags representing all the regiments of **General Thielmann's 3rd Prussian Corps**, and **Marshall Grouchy's French forces** that fought at the Battle of Wavre, on June 18th, 1815.

In addition, they also includes the flags of:

- **The Prussian regiments that were on the march to the Waterloo battlefield**, but did not arrive in time to affect the outcome.

- **The French 7th infantry division of General Girard**, detached from Reille's II Corps to fight at Ligny under Vandamme, but which did not fight at Waterloo or Wavre. Girard was mortally wounded and his division suffered great casualties, so thereafter took no further part in the campaign.

**The only flags still remaining for me to complete the entire 100 Days campaign**, are the 17,000 British, Hanoverian and Dutch-Belgian forces that were stationed at Hal, unused by Wellington. No requests for these yet, but I will probably do them just to complete the Waterloo project.

**"The Battle of Leipzig"**  
**6mm/10mm/15mm**

**Now planned for 2025...**

**It's a massive project and after reflecting on the enormity of the task**, I realized that I'm going to need a lot more time to do this one!

My apologies therefore to my patrons hoping for an earlier delivery... I am, but human! And for those wondering if AI might assist in the task...not a chance in hell.
